Topics discussed:

WITS Billing

The WITS billing extract is in the September release. **Please do not batch in WITS until further notice. If you do, the batch items will be prematurely billed when this is pushed to Production.**

CPT/Service Changes

Due to the SUD WITS implementation, Robert is working on the CPT code guide.

July/August/September Release

Robert reviewed the bugs and changes that were included in the release for July/August/September which affect Mental Health. Detailed information is available on the Mental Health Data drive. A question was asked about the Link Consents and Clinical Supervisor permissions; Robert explained how they were tied together and are being separated.

Clients Changing from Child to Adult

Region 6 had a question about this. They currently close the episode of care for the child and then open a new one as an adult. Robert advised this decision is up to the discretion of each region. You can change the domain from Child to Adult. Some regions continue the episode of care.
